Profile

XYZ Private Limited (Frozen IQF) is a leading processor and supplier of frozen vegetables and cold storage services. It was founded in mid 1990's as a cold storage service company which launched its Frozen Foods division in 2007. Located in North India, it employs 53 people on a full time basis and contracts with over 200 hourly workers during the processing seasons.

XYZ Pvt. Ltd divisions currently include :-

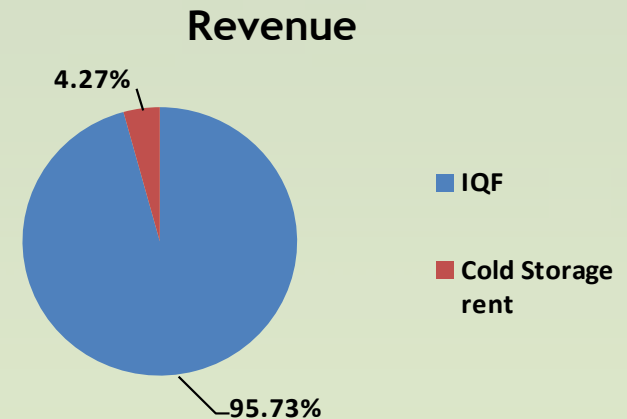

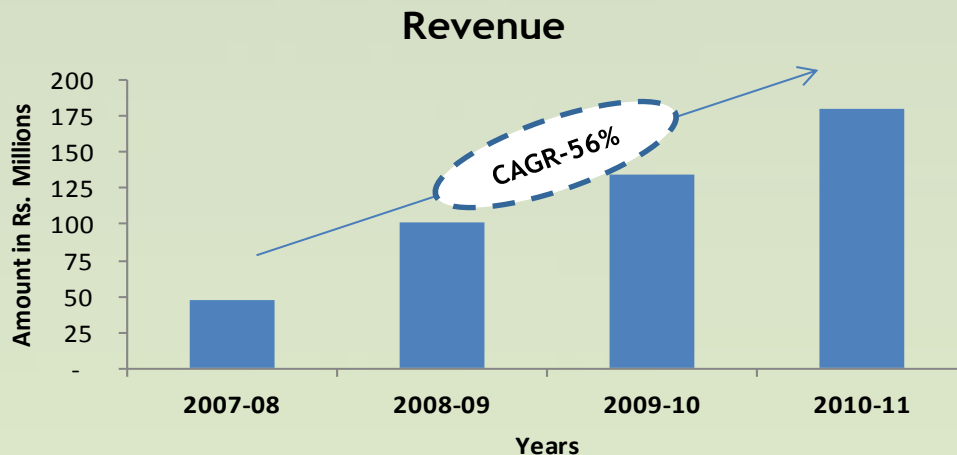

- IQF Division (Frozen Food Division)
- Cold Storage Division (CS Division)

IQF Division:

Its IQF division sells processed frozen foods directly under its “XYZ Brand” brand, through distributors and directly to companies and Institutions. XYZ Pvt. Ltd is one of the highest selling brand in Delhi & NCR after Safal (which is owned by Mother Dairy). The IQF division processes green peas, sweet corn, cauliflower, spinach and mixture of these and other vegetables. The IQF division employs latest technology i.e. IQF from Sweden and Dicer from USA

Cold Storage Division

XYZ Pvt. Ltd cold storage division provides storage facilities to farmers on a rental basis.

Processing

➤ Vegetables (after preparing to process) are passed through a blower and on to inspection belt.

➤ Then vegetables are then washed with R.O. water and fed on to a Blancher to heat the vegetables in a definitive time cycle up to a certain temperature for a certain time.

➤ The vegetables are now passed through cold water and then chilled water (4°C) to cool down the temperature of vegetables before freezing.

➤ Then these vegetables are passed over a shaker to remove surface water and final inspection is done before feeding these on to IQF.

➤ The IQF operates at - 40° C. The frozen vegetables are then packed and stored in cold room at -18°C to - 20°C. Before selling, these vegetables are taken out, re-inspected & passed through a Metal Detector and packed.
